Document Purpose:

The purpose of this document is to exhaust the step-by-step process of the Use Cases in every scenario possible.

Target Audience:

To our project client and adviser, our fellow 191 classmates, and our future selves when they need to refer back to this document.

Revision Control:

Revision Date	Person Responsible	Version Number	Modification
09/18/15	Lopez, Matthew	1.0	Initial Document
09/25/15	Torres, Jacob	1.1	Edited the post-conditions
09/25/15	Dimaano, Diego	1.2	Edited the post-conditions Revised the use case diagram and the activity flow

Use-Case Name: Log-in to or create account

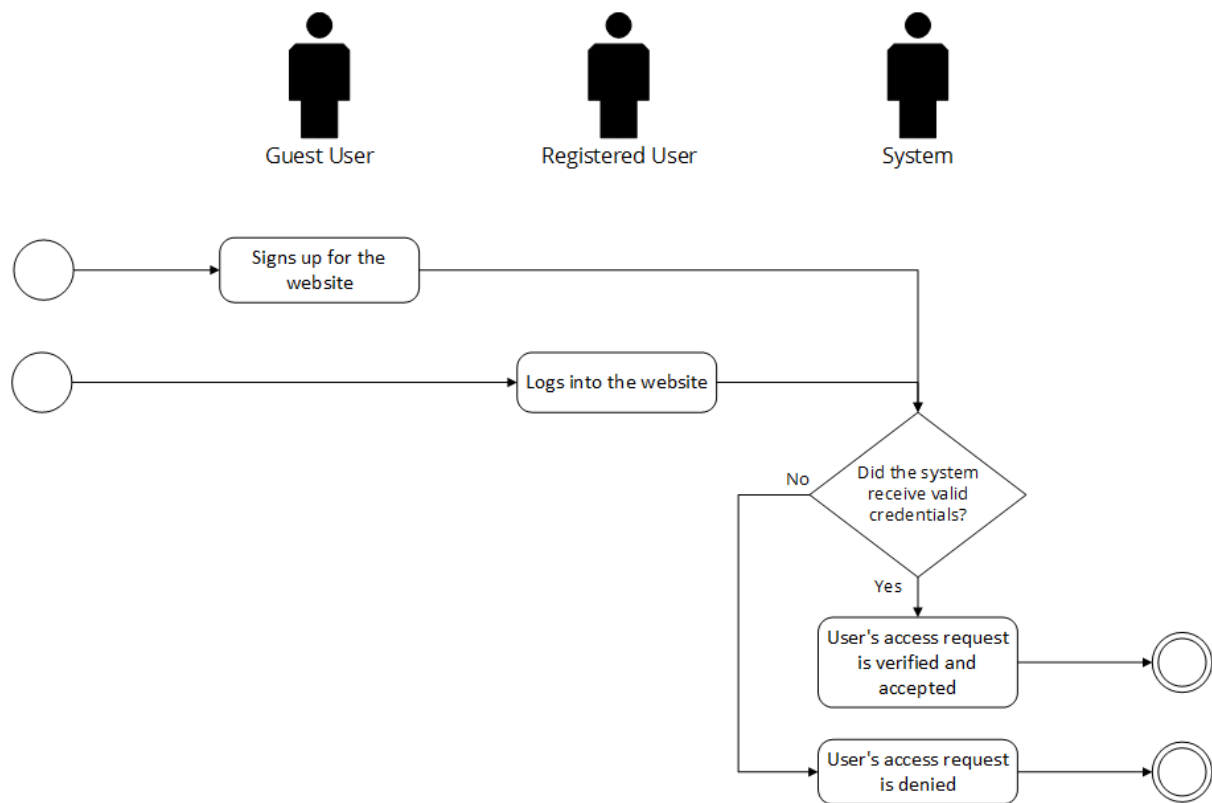

Description: This is when a Guest User wants to have an account registered at Eventi, or a Registered User wants to log-int into his account. Creating an account upgrades the status of a Guest User to Registered User, thereby including additional functionalities such as uploading events. Users who are newly registered are no longer called Guest Users.

Preconditions: A User has loaded the Eventi Website.

Flow of Events:

Scenario Name	Description
Scenario 1 (Basic Flow) Guest User creates an account	<ol style="list-style-type: none">1. Guest User clicks on the Sign Up button2. The Sign Up page is displayed3. Guest User inputs necessary credentials4. Guest User clicks submit5. The system displays a dialogue box indicating a successful registration and proceeds to the login page where they can input the now Registered User's account
Scenario 2 Guest User fails to creates an account	<ol style="list-style-type: none">1. Guest User clicks on the Sign Up button2. The Sign Up page is displayed3. Guest User inputs necessary credentials4. Guest User clicks submit5. The system displays an error relating the credentials inputted.
Scenario 3 Registered User signs in into account	<ol style="list-style-type: none">1. Registered User clicks on the Log in button2. The Log in button is displayed3. Registered User inputs necessary credentials4. Registered User clicks submit5. User is redirected to account home page
Scenario 4 Registered User fails to sign in into account	<ol style="list-style-type: none">1. Registered User clicks on the Log in button2. The Log in button is displayed3. Registered User inputs necessary credentials4. Registered User clicks submit5. Log in unsuccessful

Activity Diagram of the Flow of Events:

Post-conditions: Once a guest user has successfully created an account, he/she can now log in and edit his/her account by subscribing to organizations' events and create an organization. Failure or cancelling the log-in/account creation will render all provided information as void.

Special Requirements: NONE
