

## CS 192 AY 2014-2015 Lessons Learned Report

**Prepared by: Matthew Lopez**

**Date: April 18, 2016**

**Project Name: Watudu**

**Client: Dr. Annette Lagman**

**Sprint Number: 5**

1. What were the main lessons your team learned in this sprint?

- > We learned more about the UX side of the website, specifically, that of the wants of the client.
- > Dependencies in feature making are urgent matters; they must be dealt with fast.
- > Development is possible even after migration to the server.

2. Describe one example of what went right in this sprint.

- > Consultation with client was even more frequent, thus updating on the progress of the website, and towards the right direction.
- > Almost all basic functionalities (the very minimal requirement) are implemented.

3. Describe one example of what went wrong in this sprint.

- > There are still undone features found in the implementation plan that needs to be added.
- > All-nighters (hackathons) prove to be unproductive when sleep is the worst enemy.

4. What will you do differently on the next sprint based on your experience working on the current sprint?

- > Work faster, add more priority, accomplish all dependencies
