

# CS 192 AY 2015-2016 Lessons Learned Report

**Prepared by: The CaPitali\$t\$**

**Date: February 5, 2016**

**Project Name: Watudu**

**Client: Dr. Annette G. Lagman**

**Sprint Number: 1**

## 1. What were the main lessons your team learned in this sprint?

We should have coordinated with the Mobile app counterpart team way before as to have a unified common ground, plus proper coordination and direction. We should have studied the software way before, or at least accommodated installation in the sprint estimates.

## 2. Describe one example of what went right in this sprint.

We have managed to better define and simplify the requirements with the client. Also, we managed to identify and unify a direction for both the Web and Mobile apps in terms of design.

## 3. Describe one example of what went wrong in this sprint.

We had difficulties in setting up the software installation platform (e.g. Ruby on Rails, and Linux).

## 4. What will you do differently on the next sprint based on your experience working on this current sprint?

Firstly, we will consult with our client even more frequently. Secondly, we will maintain good communication with the Mobile app counterpart, and perhaps make better estimates from now on. Lastly, we will comply with our set deadlines for the deliverables as much as our abilities allow us to.
