## Use Case Specification

Submitted to:

Asst. Prof. Ma. Rowena C. Solamo  
Faculty Member  
Department of Computer Science  
College of Engineering  
University of the Philippines, Diliman

Submitted by:

Dimaano, Aaron Diego I.  
Lopez, Matthew S.  
Torres, Jacob Angelo V.

In partial fulfillment of academic requirements  
for the course  
CS 191 Software Engineering I  
of the  
1<sup>st</sup> Semester, AY 2015-2016

### **Document Purpose:**

The purpose of this document is to exhaust the step-by-step process of the Use Cases in every scenario possible.

### **Target Audience:**

To our project client and adviser, our fellow 191 classmates, and our future selves when they need to refer back to this document.

### **Revision Control:**

<b>Revision Date</b>	<b>Person Responsible</b>	<b>Version Number</b>	<b>Modification</b>
09/18/15	Dimaano, Diego	0.1	Initial Draft of Flow of Events
09/18/15	Lopez, Matthew	1.0	Initial Document
09/25/15	Torres, Jacob Angelo	1.1	Edited the flow of events and post-conditions

**Use-Case Name:** Create organization

**Description:** This is a feature concerning the Registered User. If an organization page does not exist, a user may create one and use it as the medium to post events under the organization name. This serves as the centralization of events per org.

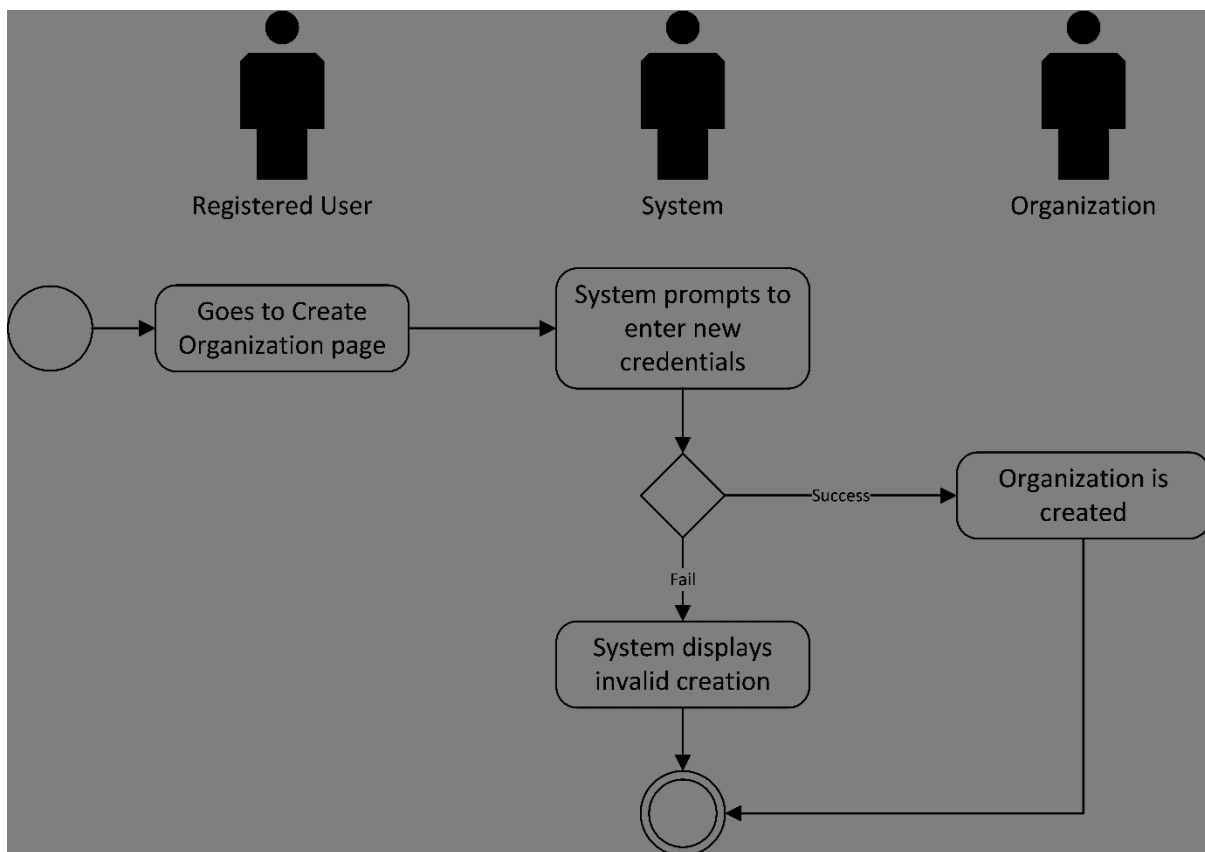

**Preconditions:** The Registered User has an account and is logged in.

### **Flow of Events:**

<b>Scenario Name</b>	<b>Description</b>
Scenario 1 (Basic Flow) Registered User creates an organization	<ol style="list-style-type: none"><li>1. Registered User goes to the create Organization page</li><li>2. System prompts Registered User to provide the Organization's credentials</li><li>3. Registered User provides the system with the Organization's credentials</li><li>4. System accepts the credentials provided by the Registered User for the organization</li><li>5. The Organization is created under the Registered User</li></ol>
Scenario 2	<ol style="list-style-type: none"><li>1. Registered User goes to the create Organization page</li></ol>

<b>Scenario Name</b>	<b>Description</b>
Registered User provides invalid credentials for creating the organization	<ol style="list-style-type: none"> <li>2. System prompts Registered User to provide the Organization's credentials</li> <li>3. Registered User provides the system with the Organization's credentials</li> <li>4. System points out the invalidity in the provided credentials</li> <li>5. System prompts Registered User to re-input the Organization's credentials</li> </ol>

*Activity Diagram of the Flow of Events:*

**Post-conditions:** Once an organization account has been made, the creator of the organization can now add registered members exclusive for that organization they can upload their events.

**Special Requirements:** None
