Link to this document:

Document Purpose:

The purpose of this document is to exhaust the step-by-step process of the Use Cases in every scenario possible.

Target Audience:

To our project client and adviser, our fellow 191 classmates, and our future selves when they need to refer back to this document.

Revision Control:

Revision Date	Person Responsible	Version Number	Modification
09/18/15	Dimaano, Diego Lopez, Matthew Torres, Jacob	1.0	Initial Document

Use-Case Name: Follow organization account

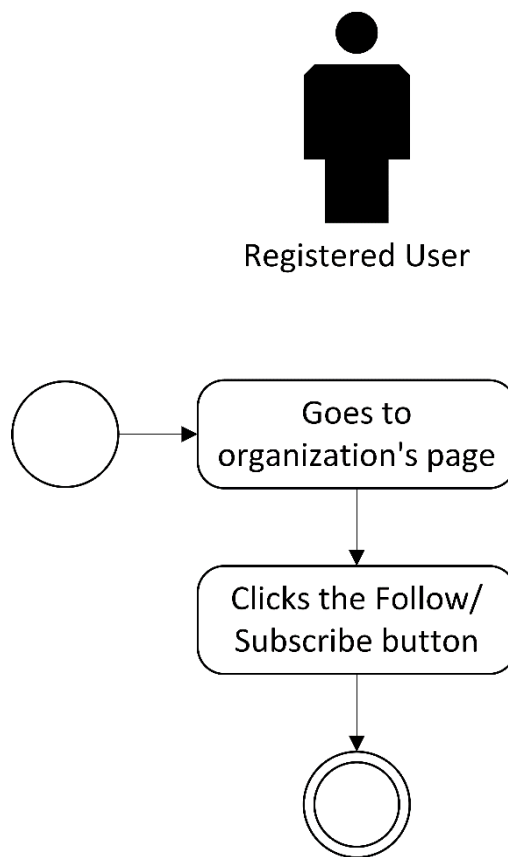

Description: This is an added functionality for registered users so that they keep updated regarding the events held by a certain organization. The events held by followed organizations shall appear on the registered user's events board. Of course, if there's a feature to follow an organization, there's also the choice of unfollowing the organization, so that they no longer appear on the registered user's events board.

Preconditions: The Registered User is logged in.

Flow of Events:

Scenario Name	Description
Scenario 1 (Basic Flow) Follow an organization	<ol style="list-style-type: none">1. Registered User opens an Organization's profile page (view Use Case 2.1)2. Registered User clicks the follow button on the Organization's profile page

Activity Diagram of the Flow of Events:

Post-conditions: **Successful:** The Registered User has followed or subscribed to the organization account.
 Failed: The subscription did not push through.

Special Requirements: NONE
