

Eventi

Use Case Specification

Submitted to:

Asst. Prof. Ma. Rowena C. Solamo
Faculty Member
Department of Computer Science
College of Engineering
University of the Philippines, Diliman

Submitted by:

Dimaano, Aaron Diego I.
Lopez, Matthew S.
Torres, Jacob Angelo V.

In partial fulfillment of academic requirements
for the course
CS 191 Software Engineering I
of the
1st Semester, AY 2015-2016

Unique Reference:

The documents are stored in https://github.com/Tom-2013-06417/CS191-192_Event_Sharing/tree/master/02-Requirements%20Engineering.

Link to this document:

Document Purpose:

The purpose of this document is to exhaust the step-by-step process of the Use Cases in every scenario possible.

Target Audience:

To our project client and adviser, our fellow 191 classmates, and our future selves when they need to refer back to this document.

Revision Control:

Revision Date	Person Responsible	Version Number	Modification
09/18/15	Dimaano, Diego Lopez, Matthew Torres, Jacob	1.0	Initial Document

Use-Case Name: Flag events

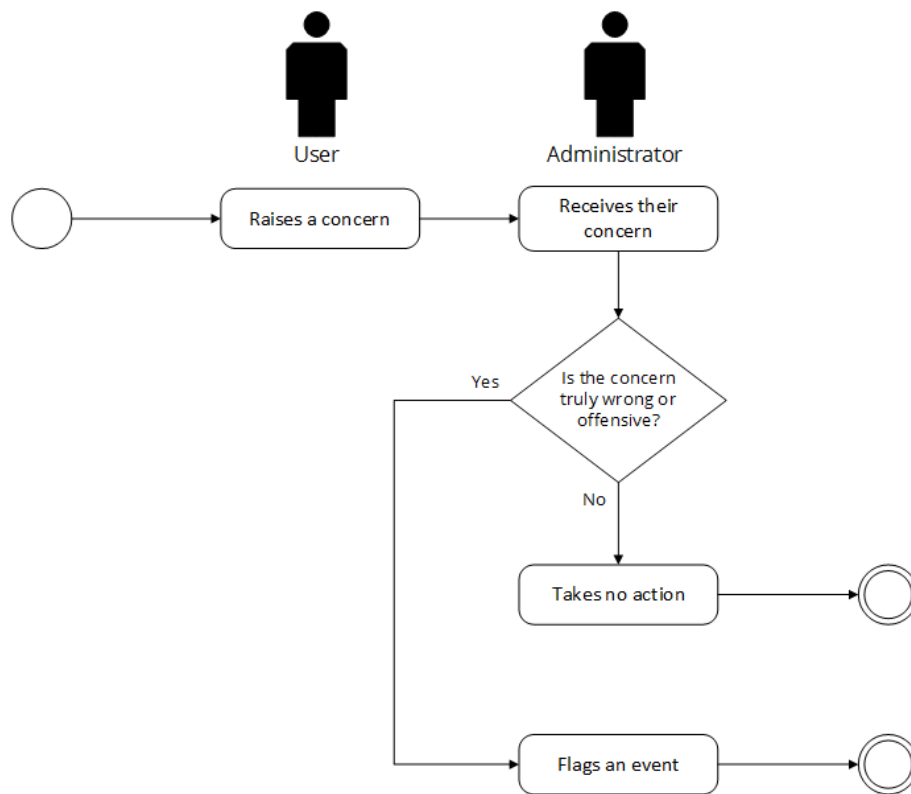

Description: This feature enables control over the site's content by having the ability to take down events deemed inappropriate by both the administrators and the users.

Preconditions: There is an internet connection to the Eventi server and a device with browsing capabilities.

Flow of Events:

Scenario Name	Description
Scenario 1 (Basic Flow) Administrator receives a valid complaint from a User about a wrong / offensive content	1. Administrator receives a complaint from a user about wrong / offensive content in an event 2. Administrator reviews the complaint and finds that the content truly wrong / offensive 3. Administrator flags the event
Scenario 2 Administrator receives an invalid complaint from a User about a wrong / offensive content	1. Administrator receives a complaint from a user about wrong / offensive content in an event 2. Administrator reviews the complaint and finds that the content truly wrong / offensive 3. Administrator does not flag the event

Activity Diagram of the Flow of Events:

Post-conditions:

- Successful:** The Eventi homepage has successfully loaded and the events are shown.
- Failed:** The website did not load.

Special Requirements: NONE
