Document Purpose:

The purpose of this document is to exhaust the step-by-step process of the Use Cases in every scenario possible.

Target Audience:

To our project client and adviser, our fellow 191 classmates, and our future selves when they need to refer back to this document.

Revision Control:

Revision Date	Person Responsible	Version Number	Modification
09/18/15	Dimaano, Diego	0.1	Initial Draft of Flow of Events
09/18/15	Lopez, Matthew	1.0	Initial Document
09/25/15	Torres, Jacob Angelo	1.1	Edited the post-conditions

Use-Case Name: View event details

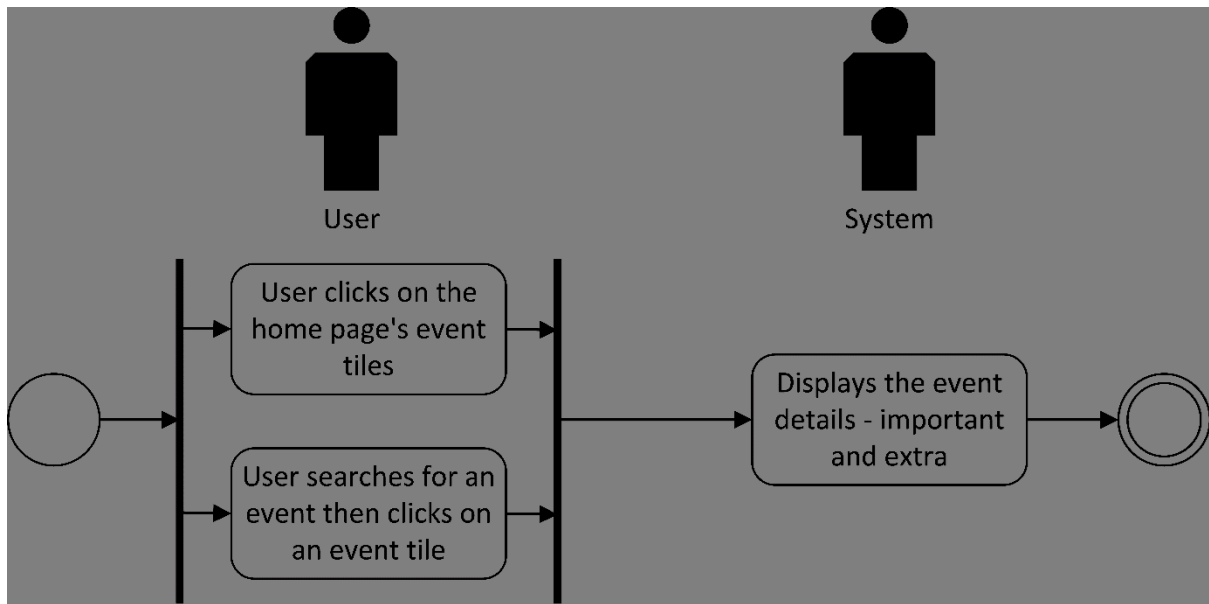

Description: This is a drop-down feature of the after-search page. The users would see the important details of the event, including tags, and the organization itself. Users may see a small statistic indicating how many people are going to the event.

Preconditions: The user can see the displayed events in the home page or in the results page after searching.

Flow of Events:

Scenario Name	Description
Scenario 1 (Basic Flow) Users views an event tile from the home page	1. User expands an event on the home page 2. User sees the event details, including the organization responsible
Scenario 2 Users views an event tile from the results page after searching	1. User expands an event on the search page 2. User sees the event details, including the organization responsible

Activity Diagram of the Flow of Events:

Post-conditions: NONE

Special Requirements: NONE
