Use-Case Name: Manage own event

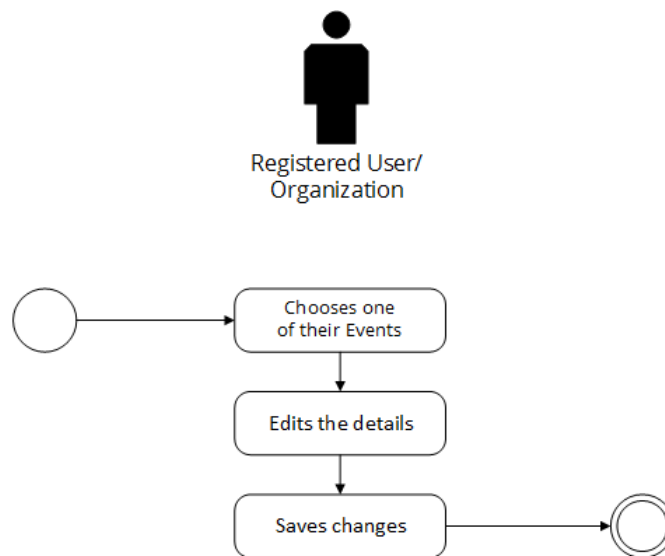

Description: This feature lets the organization edit the event once it has been uploaded. Whenever there has been a change in the specifications of the event, the organization has the opportunity to edit the information.

Preconditions: There is an internet connection to the Eventi server and a device with browsing capabilities. A registered user that has permission to operate an organization must be currently logged into the site.

Flow of Events:

| Scenario Name | Description |
|--|--|
| Scenario 1 (Basic Flow) Organization wants to edit information from the event | 1. Registered User clicks an event it has uploaded and selects the edit option 2. Registered User changes the data it wanted to change 3. Registered User saves changes and closes the edit option |

Activity Diagram of the Flow of Events:

Post-conditions: **Successful:** The event's changes were also recorded and reflects on other user's home pages.
 Failed: The event's changes were not saved.

Special Requirements: NONE
