Use-Case Name: View statistics

Description: A feature which allows you to see how well your events have been doing. This functionality aims to provide you with statistical data which you can use to improve your future events. This is also great for people who need to quantify the objectives for their events.

Preconditions: There is an internet connection to the Eventi server and a device with browsing capabilities. A registered user that has permission to operate an organization must be currently logged into the site.

Flow of Events:

Scenario Name	Description
Scenario 1 (Basic Flow) User wants to view an event's statistics	1. Registered User opens the Organization's profile 2. Registered User can now operate the Organization 3. Registered User can select an event of the Organization 4. Registered User can view the event's statistics

Activity Diagram of the Flow of Events:

Post-conditions: **Successful:** The statistic has successfully loaded and they are shown.
Failed: The website did not load. There are no statistics.

Special Requirements: NONE
